`}

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11-24-03 has been entered.

1. In the filing of the RCE, Applicants requested the entry of the amendment filed 10-24-03. The amendment has been entered. Claim 18 was added. Claims 1-18 are pending.

Claim Rejections - 35 USC § 103

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1

1. Claims 10-17 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Danielov et al. (US5885974) for the reasons set forth in the previous office actions and the reasons set forth below.

In the arguments dated 10-24-03, Applicants asserted that Danielov et al. fails to teach a regimen to replenish hormones levels, rather than merely restoring the biological transfer system or metabolism of cells. Applicants further stated "Applicant invites the Patent office to demonstrate where Danielov teaches such a regimen to replenish hormone levels ratehr than merely resotring the biological information transfer system or metabolism of cells.

Applicant's arguments filed 10-24-03 and reasserted 11-24-03 have been fully considered but they are not persuasive.

It should be noted from the onset that Applicants claims are drawn to a composition. The reference teaches that composition as indicated in the prevoius office actoin. Thus, the limitaiton of the claims have been met. The reference teaches the administration of HGH in 1-10 micrograms. This concentration is well within the concentration range for HGH disclosed in the specification. Further, the reference repeatedly states that the kit can be used in parenteral form for the treatment of trauma or shock (see col. 5, lines 15-17). Further, the reference teaches that the composition results "in the resumption of normal cell metabolism" and has concentrations that are within the claimed range (see claim 4). Thus, the composition, since it is given parenterally and in the claimed concentration range, the physiological concentration would necessarily be achieved. The replnishment of hormone levels is an intended use limitation and where the claimed and prior art products are identical or substantially identical in structure or composition, a prima facie case of either anticipation or obviousness has been established. In re Bést, 195 USPQ 430, 433 (CCPA 1977). "When the PTO shows a sound basis for believing that the products of the applicant and the

Application/Control Number: 09/782,015

Page 4

prior art are the same, the applicant has the burden of showing that they are not." In re Spada, 15

USPQ2d 1655, 1658 (Fed. Cir. 1990). Therefore, the prima facie case can be rebutted by evidence

showing that the prior art products do not necessarily possess the characteristics of the claimed

product. In re Best, supra. Thus, the PTO need not furnish any teachings of the intended use. The

mere fact that the reference a different use is not dispositve of a prima facie case of obviousness.

Thus the rejection is maintained.

2. Claim 18 is allowed over the prior art. The reference of Danielov et al. does not teach nor

suggest the combination of human growth hormone and pregnenolone in a dosage range of 100

and 200 mg per day. Thus, the claim is allowable over the prior art.

3. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Anish Gupta whose telephone number is (703) 308-4001.
If attempts to

reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can

normally be reached on (703)306-3220. The fax phone number of this group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application should be directed

to the Group receptionist whose telephone number is (703) 308-0196.
